

20250812日报

今日工作内容

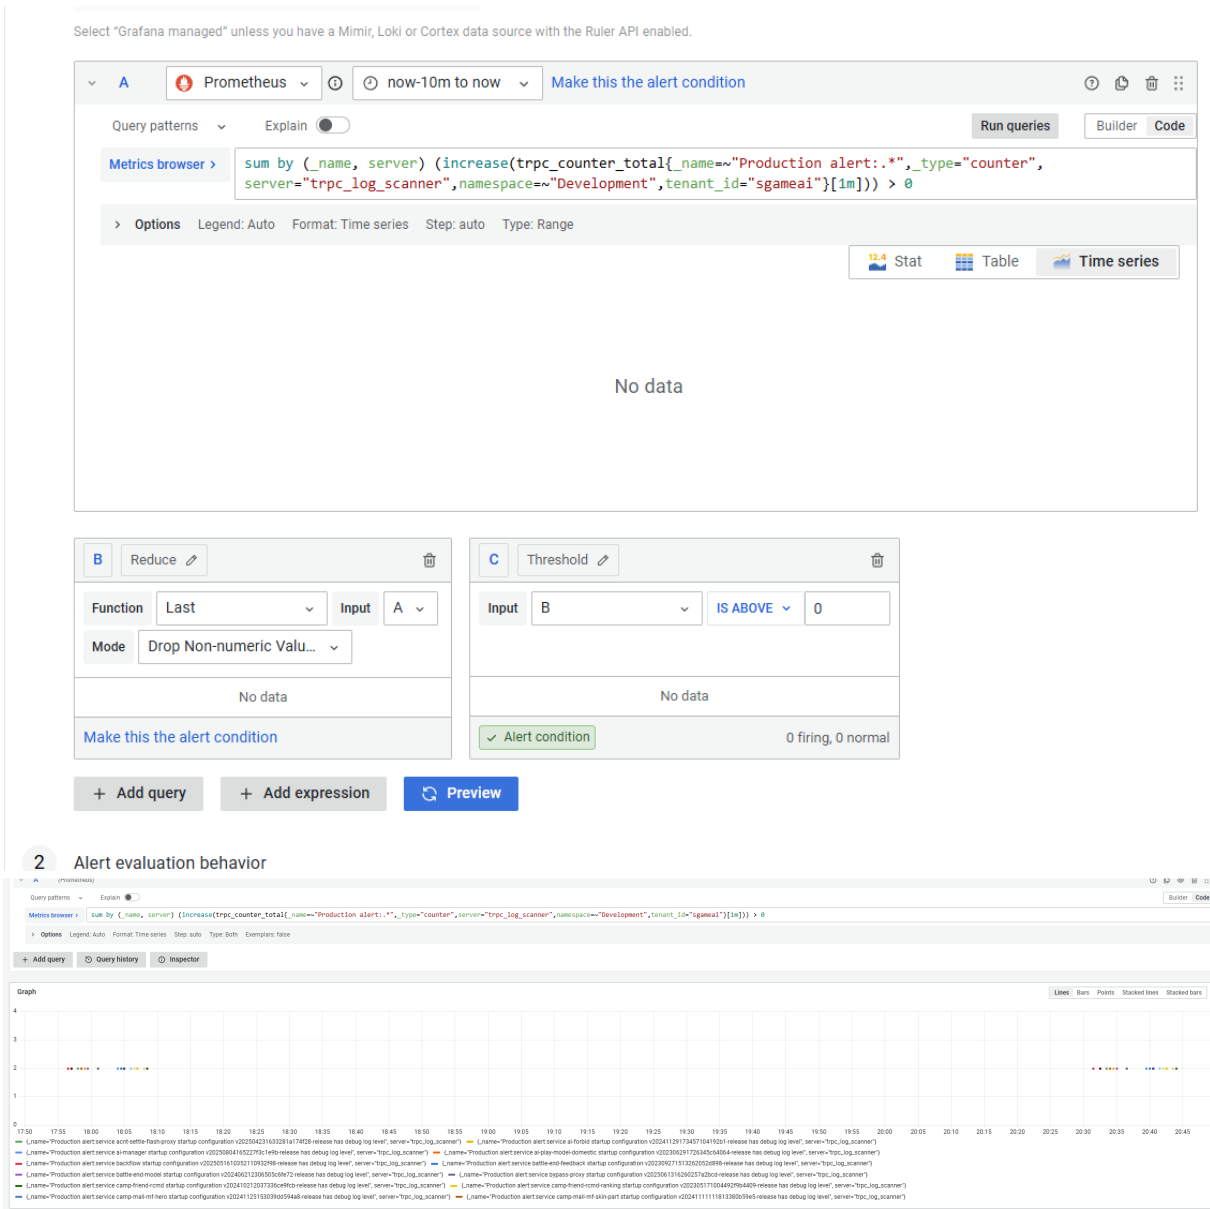

1. 导出海外正式服服务的所有gdp配置yaml文件；

```
1  const (
2      apiHOKAddr    = "http://gdppapi.gdpsg.com"
3      projectHOKName = "sgameai-global"
4  )
5
6  func main() {
7      configDir := "hokconfigs/"
8      services := task.ListAllServices(apiHOKAddr, projectHOKName)
9      for _, service := range services {
10         serviceName := service["paas_name"].(string)
11         configGoVersions := task.GetStartupConfigList(apiHOKAddr,
projectHOKName, serviceName, "trpc-go-yaml")
12         configPythonVersions := task.GetStartupConfigList(apiHOKAddr,
projectHOKName, serviceName, "trpc-python-yaml")
13         configVersions := append(configGoVersions, configPythonVersions...)
14         for _, config := range configVersions {
15             version := config["version"].(string)
16             data := task.SearchOneStartupConfig(apiHOKAddr, projectHOKName,
serviceName, version)
17             safeFileName := serviceName + "_" + version + ".yaml"
18             filePath := filepath.Join(configDir, safeFileName)
19             if err := os.WriteFile(filePath, []byte(data), 0644); err != nil {
20                 log.Errorf("write file failed %s: %v", filePath, err)
21             } else {
22                 log.Infof("write file success: %s", filePath)
23             }
24             log.Info(serviceName, version)
25         }
26     }
27 }
```

hokconfigs为导出文件夹。

2. 定义告警规则，在Grafana中查找到告警服务：

3. 开发“星币转区接入新的规则排序-补充次元主题品质”需求，在次元主题和次元部件中添加投放id；

```
,
items: {
  id: 82000007
  quality: "A"
  put_in_id: 10215
}
items: {
  id: 11000060
  quality: "A"
  put_in_id: 10233
}
items: {
  id: 12000060
  quality: "A"
  put_in_id: 10233
}
items: {
  id: 51000043
  quality: "A"
  put_in_id: 10234
}
items: {
  id: 52000043
  quality: "A"
  put_in_id: 10234
}
items: {
  id: 121000057
  quality: "A"
  put_in_id: 10243
}
items: {
  id: 122000057
  quality: "A"
  put_in_id: 10243
}
items: {
  id: 121000059
  quality: "A"
  put_in_id: 10244
}
items: {
  id: 122000059
  quality: "A"
  put_in_id: 10244
}
items: {
  id: 121000060
  quality: "A"
  put_in_id: 10245
}
items: {
  id: 122000060
  quality: "A"
  put_in_id: 10245
}
items: {
  id: 121040058
  quality: "S"
  put_in_id: 10246
}
items: {
  id: 122040058
  quality: "S"
  put_in_id: 10246
}
}
}
```

下图日志表示测试成功：次元部件投放id（57）对应也输出了quality字段：

8)千金不易:(20250520000000):3844(A:1623;S:0;false)小花头参:(20250520000000):3845(A:1624;S:0;false)雷打枣:(20250520000000):4070(S:10016;S:7;0;false)王豆:(20250520000000):4018(A:10017;S:7;0;false)丹参:(20250520000000):4011(A:10018;S:7;0;false)点唇心:(20250520000000):4054(A:10022;S:7;0;false)点唇心

明日待办：

1. 完成剩下的天机阁告警规则；
2. 推进torch server；
