

20250814日报

今日工作内容

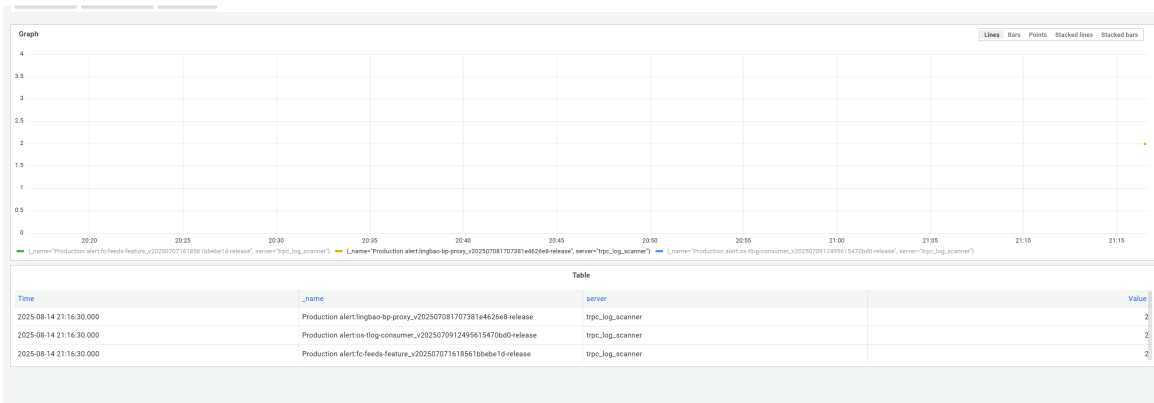

- 1. 解决昨日遗留的问题：全部告警一起触发的时候，无法发送到企微；
原因：企微对包体大小有限制，告警太多的话，堆在一起包体会超限，从而无法将告警信息发送到企微；

下面是我仅触发单个Alert时的结果：

从中可以发现，对于单个Alert，当prometheus检测到告警，就可以立即发送到企微。

下面是触发3个Alert时的结果：

[FIRING:3] (grafana-最近1m扫描到debug日志级别 trpc_log_scanner 在线服务日志级别告警 trpc_log_scanner) 发生告警

Labels:

- alertname = grafana-最近1m扫描到debug日志级别

从中可以发现，对于三个Alert，当prometheus检测到告警，也可以同时发送到企微。

2. 新建一个告警报表Dashboards，用于大家后续观察：

3. 目前计划的处理方案是：先导出一个告警表，然后让大家先改，后续再正常进行告警，这样的话就避免了由于告警太多而使包体超限的问题了；

明日待办：

- 1、和佐贤哥商量目前想的方案是否合理，若合理则推进；
- 2、推进海外Grafana的构建；
