

20250819日报

今日工作内容

- 1. hok中实现在线服务日志监控；
 - a. Alerting rule：

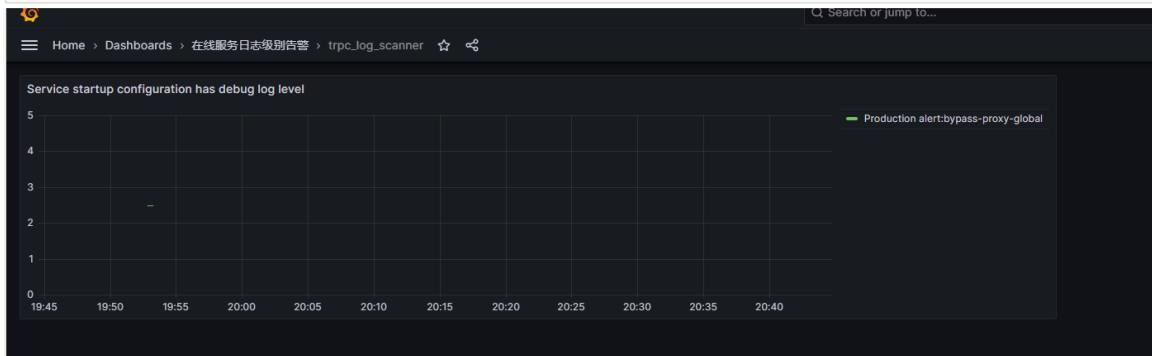

- b. Contact Point的设置：

The screenshot shows the 'Update contact point' form in Grafana. The form includes fields for 'Name' (在线服务日志级别告警), 'Integration' (WeCom), 'Webhook URL' (Required if using GroupRobot), 'Agent ID' (Required if using APIAPP, see https://work.weixin.qq.com/wework_admin/frame#apps create ApiApp), 'Corp ID' (Required if using APIAPP, see https://work.weixin.qq.com/wework_admin/frame#profile), and 'Secret' (Required if using APIAPP). There are also sections for 'Optional WeCom settings' and 'Notification settings'. A '+ Add contact point integration' button is at the bottom.

- c. 创建dashboard表：

规则为：

```
1 sum by (_name) (increase(trpc_counter_total{_name=~"Production
alert:.*",_type="counter",service=~"trpc-log-scanner-dev-v1"}[1m])) > 0
```

d. 在企微信群通过url告警，得到测试效果：

【HOK】在线服务日志级别告警

Grafana告警 8/19 19:16:24

[FIRING:1] (TestAlert Grafana)
Firing
 Value: [no value]
 Labels:
 - alertname = TestAlert
 - instance = Grafana
 Annotations:
 - summary = Notification test
 Silence: <http://localhost:3000/alerting/silence/new?alertmanager=grafana&matcher=alertname%3DTestAlert&matcher=instance%3DGrafana>

Grafana告警 8/19 20:21:10

[FIRING数量:1]
发生告警
 Labels:
 - alertname = grafana-最近1h扫描到debug日志级别
 - alert_type = trpc_log_scanner
 - grafana_folder = 在线服务日志级别告警
 Annotations:
 - summary = 在线服务日志最近1h内存在debug级别
 静默*****

明日待办：

1. 完成aov的在线服务日志监控；
2. 研究torch server；
